PWA SOURCE-BASED BLUEPRINT

Actual figures extracted from the uploaded November workbook. Values with formula errors or missing source tabs are clearly flagged.

TOTAL ROOMS	24-ITEM ROOMS	0-ITEM RECORDS	ROOM STOCK	STORE STOCK	SOLD CAPTURED	DISPUTE
312	100	212	2,400	2,533*	1 unit	0

*Store subtotal includes readable numeric values only; two SKU balances show #REF!. ROOM total 2,400 matches the ROOM STATUS matrix.

PWA module map

Dashboard	Room Inventory	Minibar Store	Sold Capture	Loss / Dispute	Internal Transfer	Activity History
312 rooms; KPI, floor and stock overview.	312 room cards; room number, floor and live item quantities.	36 SKUs; central stock, IN/OUT, room stock and search.	Guest consumption and sold quantity/value.	Damaged, missing and disputed items.	Store-to-outlet transfer with notes and audit fields.	Filter by room, date, item, activity and staff.

Key interpretation

Room snapshot	100 rooms have exactly 24 recorded units; 212 rooms have 0 recorded units; 0 rooms have 1-23 recorded units.
SKU snapshot	36 SKU columns in ROOM STATUS; 30 SKUs have non-zero room stock in at least one room; 6 SKUs are zero across all rooms.
Category compliance	No Category column exists in the workbook. Do not decide 24-category status until all 36 SKUs are mapped to the approved category list.
Outlet master	No outlet worksheet or transfer ledger exists. Create an empty outlet master in the PWA and allow authorised users to add/archive/restore outlets.

ROOM MASTER & ROOM INVENTORY SNAPSHOT

Source tab: ROOM STATUS. Room number: column A. SKU quantities: columns B:AK (36 columns). Room item total: column AL.

21	22	2101, 2102, 2103, 2105, 2106, 2107, 2108, 2109, 2110, 2112, 2114, 2116, 2118, 2120, 2122, 2124, 2125, 2126, 2127, 2128, 2129, 2130
23	18	2301, 2302, 2303, 2305, 2306, 2307, 2308, 2309, 2310, 2312, 2314, 2316, 2317, 2318, 2319, 2320, 2321, 2322
25	10	2501, 2502, 2503, 2505, 2506, 2507, 2508, 2509, 2510, 2511
26	13	2601, 2602, 2603, 2605, 2606, 2608, 2610, 2611, 2612, 2614, 2615, 2616, 2622

Note: the workbook's 0-item rows do not say whether the room is physically Empty or simply not inventoried. The PWA should initially preserve the source as '0 items recorded' until a validated operation explicitly marks Empty.

ROOM CARD LOGIC & IMPORT STRUCTURE

Each PWA room card will be driven from the actual room list and its 36-SKU quantity vector in the workbook.

Room card summary	Show Room No., Floor, total item quantity, inventory state and last updated time. The companion CSV carries all 36 SKU columns for each of the 312 rooms.
Zero-quantity room	Do not automatically label a 0-item source row as physically Empty. Use '0 items recorded' at initial import until confirmed by a staff action.
24-item room	Show 24 item units in the room card. Category-based Full Setup still needs the approved SKU-to-category mapping; the workbook itself has no category field.
Partial inventory	The current snapshot has no room with 1-23 items. Future staff updates must support partial values and missing-category alerts.
Six zero-room SKUs	Aqua Reflection Still 380 ml; IRD Coke Zero; Le Fruit Orange Juice 250 ml; Le Fruit Apple Juice 250 ml; Tong Garden Almond 140 gr; Cadbury Chocolate Milk Bar 25 gr.

Import references created

Room Inventory Import CSV	312 room rows, 16 floors, 36 SKU quantity columns, and per-room totals.
Store Import CSV	36 SKU rows with IN, OUT, Store Qty, Room Qty and explicit data quality flags.
SKU Category Mapping Review CSV	Proposed category mapping based on the 24-category catalog previously supplied; ambiguous additions remain flagged for confirmation.
Outlet Master Template CSV	Empty master structure because the workbook contains no outlet records.

MINIBAR STORE - SKU STOCK REFERENCE

Source tab: STORE. Source values are carried over as displayed. Formula errors and blank inputs are not changed into zero.

Readable numeric subtotals: IN 2,414 (33 values); OUT 1,850 (33 values); STORE 2,533 (34 values); ROOM 2,400 (36 values).

SOLD, LOSS / DISPUTE & DATA QUALITY

These values come from the workbook's SOLD, DISPUTE and BALANCE tabs. The PWA should use transaction-level records for all future activity.

SOLD ITEM	QTY	VALUE	SOURCE NOTE
MB-Soyjoy Almond Choc 30gr	1	IDR 68,000	SOLD row 30 shows 1 aggregate unit and IDR 68,000. The daily date columns for that item are blank, so no event timestamp can be inferred.

DISPUTE: all 26 item rows show zero in their total column; sum of displayed item totals is 0. No separate Loss tab exists. BALANCE has a SPOIL/EXPIRED field, but the visible entries are blank.

Data-quality blockers

STORE	Two SKU rows have #REF! in IN, OUT and STORE: Cadbury Chocolate Milk Bar 25 gr; IRD Coke Zero. Tong Garden Almond 140 gr has blank IN/OUT with STORE=18 and ROOM=0.
Missing SKU detail tabs	The workbook has 33 item-detail worksheets for 36 SKU rows. Cadbury Chocolate Milk Bar detail tab and Coke Zero 250 ml detail tab are missing/broken references; Tong Garden Almond has no detail tab.
BALANCE	88 cached formula errors: 85 #ERROR! and 3 #REF!. Actual Stock / Selling Total / Percentage should not be treated as authoritative.
SOLD alias	SOLD records 'MB-Soyjoy Almond Choc 30gr'; STORE records 'MB-Soy Joy Energy Bar 30 gr'. Confirm these are the same SKU before joining the totals.
CATEGORY	No Category column is present in this workbook. 24-category compliance requires a reviewed mapping for all 36 SKUs.
OUTLET	No outlet list or transfer ledger exists. Outlet Master should start empty and be maintained through PWA Add / Archive / Restore.

PWA WORKFLOW & INTERNAL TRANSFER SPECIFICATION

Recommended behavior for the Minibar Daily Operation workspace. This is a functional blueprint, not an implementation or live connection.

TRANSACTION	ROOM INVENTORY	MINIBAR STORE	RESULT
Refill to Room	+ quantity	- quantity	Stock moves from Store to selected Room.
Remove / Return	- quantity	+ quantity	Only items physically returned and still usable go back to Store.
Guest Consumption / Sold	- quantity	No change	Sold Capture increases; consumed items never return to Store.
Lost / Dispute	- quantity	No change	Loss/Dispute is tracked separately from Sold.
Internal Transfer to Outlet	No change	- quantity	Selected outlet stock increases by the posted quantity.

Internal Transfer form requirements

Transfer ID	Automatically generated, unique and idempotent.
From / To	From = Minibar Store by default; To Outlet = required active outlet dropdown.
Outlet management	Add Outlet; archive/deactivate outlet without deleting historical transfers; restore if needed.
Transfer items	Add/Delete item rows; select SKU; show available Store Qty; validate positive transfer qty not greater than available stock.
Box Notes	Free-text purpose, event, reference or additional notes.
Created By / Timestamp	Created By from signed-in staff; timestamp generated by Apps Script/server time.
Post Transfer	On confirmed post, decrement Store and increment outlet stock atomically; prevent negative balances and duplicate submissions.

Workspace separation

One Vercel PWA can expose both Event Scarlet and Minibar Daily Operation. Each workspace must isolate its Google Spreadsheet ID, staff directory, sessions, data cache, durable queue, store/room inventory, history, outlet master, settings and Drive evidence folder. Never switch the Event Scarlet workspace to the Minibar spreadsheet globally.
